LETTER REPORT

SCOPE OF WORK

Functional performance testing of extended distance cabling systems to support 10BASE-T, 100BASE-T and 1000BASE-T operation.

REPORT NUMBER

Intertek Report No. 105178206CRT-001a

Intertek Project No. G105178206

Mr. Tom Valentine
Remeo Products Corp.
1751 Route 17A
Florida, NY 10921

Subject: Performance testing of extended distance cabling configuration for support of 10BASE-T, 100BASE-TX and 1000BASE-T with no BER and FCS errors

Dear Mr. Valentine:

This letter report represents the results of our evaluation of the above referenced product(s) to the requirements contained in the following document(s):

IEEE Std 802.3bt™-2018 Standard for Ethernet, Approved 14-June-2018

SECTION 1 SUMMARY

Intertek wishes to inform you that the electrical transmission tests have been performed on your channel configuration. This testing was performed under project G105178206 and quotation Qu-01290070 issued 02-August-2022. Data transmission was achieved with no BER or FCS errors at the following lengths and rates combinations:

<u>Rate</u>	<u>Length</u>
10BASE-T	1,000 ft
100BASE-TX	700 ft
1000BASE-T	656 ft

SECTION 2 NON-CONFORMANCES

None

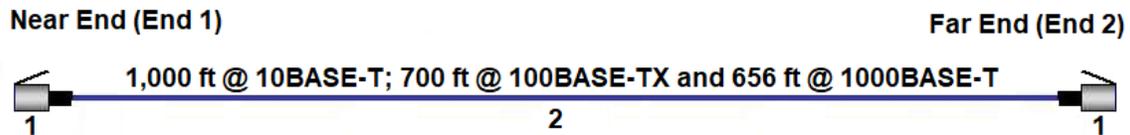

This report is for the exclusive use of Intertek's Client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this report. Only the Client is authorized to permit copying or distribution of this report and then only in its entirety. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. The observations and test results in this report are relevant only to the sample tested. This report by itself does not imply that the material, product, or service is or has ever been under an Intertek certification program.

SECTION 3

SAMPLE DESCRIPTION

The client supplied a 2-connector unshielded channel as illustrated below.

The samples were received on 12-September-2022 and were production samples in undamaged condition.

Component Id	Manufacturer	Description	Part number
1	Simply RJ45	Field terminable plug	S45-1755
2	Remeo	Unshielded horizontal (solid) cable	Activate uTP ¹

Note 1: The riser cable version p/n CMRuTP was used for the 1,000 ft test at 10Mb/s rate and the plenum cable version CMPuTP was used for the 700 ft and 656 ft tests at the 100Mb/s and 1Gb/s rates, respectively.

SECTION 4

TEST EQUIPMENT USED

The following test equipment was used to conduct the testing.

Test equipment used	Model number	Control number	Calibration due date
Aukua MGA2510	MGA2510	0100439	No calibration required
Temperature/humidity meter	OM-EL-USB-2-LCD	H243	11-May-2023

SECTION 5 TESTING

The following Ethernet events were monitored using the Aukua MGA2510 Ethernet monitoring platform.

Test description	10BASE-T	100BASE-TX	1000BASE-T
Bit Error Rate (BER)	No error	No error	No error
Frame Check Sequence (FCS) errors	No error	No error	No error
Link Loss Events	No loss of link	No loss of link	No loss of link
Errored LDCP Frames	No error	No error	No error

The screen captures at all three (3) data rates are enclosed to this letter report.

SECTION 6 PROJECT STATUS & ACTION

Issuance of this letter report completes the performance testing of this channel cabling configuration BER and FCS performance per IEEE 802.3 covered by Intertek Project No. G105178206 and quotation Qu-01290070. The test results are compliant with the requirements of the standard and sections referred to on pages 2 and 4. The testing was performed at Intertek located in Cortland, NY.

If there are any questions regarding the results contained in this report, or any of the other services offered by Intertek, please do not hesitate to contact your dedicated Intertek Project Manager.
